

Daily Learning Task 4

Year 2

Maths:

Focus: Comparing number sentences

Starter: Comparing numbers to 100.

We can use $<$ (fewer than) $>$ (greater than) and $=$ (equal to) to compare numbers.

Can you compare the following numbers by filling in the missing symbols? Remember the greedy crocodile always eat the greatest number!

32		57
33		27
99		99
27		54
93		98

Did you need to compare the amount of tens in the number, the ones or the tens and the ones?

Main activity: Comparing numbers sentences using <, > and =

Complete the sentences.

$3 + 1$ is greater than ___

$3 + 1$ is greater than ___

$3 + 1$ is less than ___

$3 + 1$ is less than ___

One bird lays 3 eggs. Another bird lays 2 eggs.

Complete the sentence using greater than, less than or equal to.

2 plus 3 is _____ 6

Complete the number sentences.

___ + ___ is equal to 7

___ + 4 is less than 9

5 + ___ is _____ 2

Can you complete your own number sentence comparisons?

5	+	2	=	6	+	1
			<			
			>			
			=			
			<			

English:

Text of the week: The Magic Paintbrush

Lo: To use the past tense by adding -ed to verbs.

Follow the online lesson from Oak Academy and learn how to use -ed to talk about verbs in the past tense by recapping the story of the magic paintbrush.

<https://classroom.thenational.academy/lessons/to-use-the-past-tense-ed-6xhp6d?activity=video&step=1>

Follow up activity:

Adding 'ed' to verbs in the past tense.

When we are writing about the past tense, we add 'ed' to most verbs.

A) Change these sentences in to the past tense by adding 'ed' to the verb.

Remember, the verb is the 'doing word'.

1. The children play with the football.
2. I walk to school everyday.
3. I jump on the trampoline.
4. I help my mum with the washing up.
5. I change my clothes when I get home from school.
6. The children talk to the teacher.
7. I dance with my friend.
8. I pour the milk on to my cornflakes.

B) Can you spot the errors in this piece of writing?

It is meant to be in the past tense but the writer has made some mistakes.

There are 5 mistakes to find!

The children look out of the window. What on earth was that?! A bizarre flying object was in the sky just above them. They jump up and ran towards the door, hoping to get a better view of the strange object. As they look up they realise it was glowing brightly like a star, but was moving across the sky as fast as a rocket. Was it a flying saucer? They listen carefully, they thought they could hear voices coming from the sky. The whole thing was very mysterious!

Other:

Focus: Computing

Learn all about Algorithms.

You use code to tell a computer what to do. Before you write code you need an algorithm.

An **algorithm** is a list of rules to follow in order to solve a problem.

Algorithms need to have their steps in the right order. Think about an algorithm for getting dressed in the morning. What if you put on your coat before your jumper? Your jumper would be on top of your coat and that would be silly! When you write an algorithm the order of the instructions is very important.

Watch this video and find out what algorithms are.

<https://www.bbc.co.uk/bitesize/topics/z3tbwmn/articles/z3whpv4>

Activity 1:

Can you write an algorithm - a set of instructions to tell someone how to do something? It could be how to make a drink, how to make a sandwich etc. Try to keep the instructions short and easy to follow but make sure to include all the important steps!

Activity 2: With a helper at home take it in turns to be a robot and direct each other around the room using the language, steps, turn, half turn, quarter turn, three quarter turn, left and right, forward and backwards.

Activity 3: Download the BeeBot app and practise using algorithms to direct the Beebot.

Ongoing tasks:

Please make sure you read your reading books.
