

REMOTE LEARNING FEEDBACK FROM PARENTS AUTUMN 1

After the feedback:

We have listened to your views! Parents were overwhelmingly positive about the package of remote learning that had been into place by our Beaumont team. In the event of a further bubble closure, we have analysed and are adapting our practice based upon the constructive feedback given.

- **Parents were concerned about too much screen time.**

We have therefore reduced the amount of time we would expect your child to be at the computer.

- **Parents were concerned about the time given to complete follow-up tasks.**

We have therefore extended the time given to complete those learning tasks.

- **Parents were concerned about juggling their own workload at home and supporting their child/children.**

We have therefore made afternoon sessions optional in KS2, in which children's work will be set by the teacher and if your child wishes to access the tasks, they can or they might choose to have some "down time" or catch-up on tasks set earlier in the day.
